

News Release – September 15, 2006

The Food and Drug Administration Awards Office of Crisis Management Contract to Dovèl Technologies, Inc.

McLean, Virginia, September 15, 2006 - Dovèl Technologies, Inc. has been awarded the Food and Drug Administration (FDA) contract to maintain, enhance and complete the implementation of the FDA's Emergency Operations Network (EON) for the Office of Crisis Management.

EON was conceived as a robust Agency-wide infrastructure that can fully support emergency staff and processes for the full range of FDA emergencies from daily product-related incidents to a large-scale terrorism event. The System complies with HSPD-5, "Management of Domestic Incidents," and fulfills the requirement to establish a National Incident Management System. Using EON's Incident Management System (IMS), the FDA's Office of Crisis Management and FDA personnel across the agency are able to collaborate and manage individual incidents or participate in emergency preparedness and response exercises, establishing vital links with federal, state and local partners in accordance with HSPD-8, "National Preparedness."

Dovèl Technologies will work with the FDA to capitalize on advances in Web and mapping technologies and enhance the FDA's ability to manage emergency situations. The company will expand access to the IMS to all FDA Centers and field offices, conduct complete architectural and system-usability reviews in order to leverage newer technologies, ensure the system's compliance with FDA standards and design, and develop and implement the required interfaces to other key agency-wide systems.

Dovèl Technologies has extensive experience modernizing complex information systems as well as a strong understanding of the FDA's mission and operating environment. "DovèlTech is very pleased to have this opportunity to expand its relationship with the FDA and to assist the organization with the enhancement of its emergency operations' system which plays a critical role in helping the FDA manage public health emergencies," said Dov Levy, President and CEO of Dovèl Technologies, Inc.

About Dovèl Technologies

Dovèl Technologies, Inc. is a Woman-Owned Small Business (WOSB) located in McLean, Virginia. The company specializes in the application of leading-edge information technology practices and solutions to the design and development of mission-critical systems for government and commercial organizations.
